**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, line 7 refers to "the reconstituted panoramic reverberation". However, there is no antecedent language for the reconstituted panoramic reverberation. Further, it is vague and indefinite what "restituting on the image of the reconstituted panoramic reverberation" means. Finally, it is not entirely clear what applicant means by "a line spectrum emission" in the context of an active sonar signal.

***Allowable Subject Matter***

3. Claims 5-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. The following is a statement of reasons for the indication of allowable subject matter:

Taking into account the above 35 USC 112, second paragraph rejections, the instant claims, and more specifically claim 5, would be considered allowable over the prior art of record by claiming a method of visualizing echoes received by an active sonar that includes the steps of a) Doppler processing the received signals, b)

Art Unit: 3662

generation of an artificial sonar image positioning the detected echoes in a bearing/distance plane, and c) the replacement in the artificial image of a representation derived from the reverberation, of that from the marine bed.

It is pointed out that the "line spectrum emission" in the instant claims need further clarification.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
